# CycleWise™

# ECO™

Inclusive, Natural, Organic

## General Information

USDA, University, and private research shows the ingredients in **CycleWise™ ECO™** reduce or control fungus and other diseases that attack plants. The ingredients also act as a controlled nutrient release, increase soil water retention, and build enzymes in plants increasing the immune and phyto-defense systems.

### Directions

**CycleWise™ Global ECO™** can be spray applied to foliage at the rate of 1 to 2 quarts per acre every 4 to 6 weeks or as needed. Mix with a minimum of 5 gallons of water per acre or 4 to 8 ounces of **CycleWise™ ECO™** per gallon of water spray until plants are slightly wet.

**Soil & Turf Application:** Apply 1 to 4 quarts per acre as needed with a minimum of 5 gallons of water per acre. For smaller, more intensive growing areas, apply at rate of 6 to 10 ounces with a minimum of 1 gallon of water using hand garden sprayer or through water hose and applicator per each 1000 sq . ft.

**Seed Treatment:** Use 2 quarts of **CycleWise™ ECO™** mixed with 1 gallon of water spray apply on seed or bulbs until slightly damp. In row use at planting 2 to 4 quarts of **CycleWise™ ECO™** per acre with a minimum of 4 gallons of water.

**Potting Media Mix:** Spray apply 6 to 8 ounces of **CycleWise™ ECO™** with a minimum of 1 quart of water for each 1 cubic yard of potting media. Mix and blend into media.

**Ornamentals:** Use 6 to 8 ounces of **CycleWise™ ECO™** mixed in 1 gallon of water spray until leaves are slightly damp. Flowers: 1 to 2 ounces of **CycleWise™ ECO™** mixed in 1 gallon of water spray fine mist until foliage is slightly damp.

*Apply with aerial or any ground driven spray equipment or through fertigation system.*

**IMPORTANT:** Always add product last to spray tank containing required amount of water. Rates may vary due to soil tiling methods, climate conditions, and frequency of application. Apply to foliage during early morning, late afternoon or during nighttime.

## Features and Benefits

- \* Natural pathogenic protection (NPP)
- \* Spore/insect invasion defense
- \* Leaf surface spore and insect defense
- \* Genetic immunity builder
- \* Enhancing plant maturity, yields, and quality
- \* Fungus control
- \* Virus, blight control
- \* Nematode control
- \* Control bacteria spot
- \* Control aflatoxin in peanuts, cotton, corn, pistachios, and wheat
- \* Increases soil water holding structure
- \* Deeper more massive rooting
- \* Decrease soil toxicity and chemical runoff into ground water and streams for improved environment
- \* Builds plants natural defense
- \* Reduces plant evaporation & transpiration
- \* Enhances the thickness of the cell wall (mycelium lining)
- \* Increases harvested crop minerals, vitamins, sucrose and shelf life via special delivery system (Chelation)
- \* All plants including turf endure more drought, and other stressful conditions
- \* Certified organic (National Organic Program)
