# CycleWise™ Outbound™

The ultimate organic pest management  
surfactant for chewing insects

## General Information

**CycleWise™ Outbound™** is an all natural biochemical formulated to repel and suppress parasites and minimized plant damage that may be caused by insects. A special formula of fructose and complex carbohydrates, blended with naturally occurring sugars, increases the plant self defense system by raising the sucrose level throughout the plant, repelling insects without upsetting plant life.

**CycleWise™ Outbound™** can be used with other soil and foliar-applied products in balanced, intergraded pest management programs.

**CycleWise™ Outbound™** is safe for animals, ornamentals, and surface/ground-water.

## Directions for Application

### Foliar Application:

Apply 1-2 quarts of **CycleWise™ Outbound™** per 100 Gallons of water every 3-4 weeks or as needed.

### Soil Application:

Apply 1-3 quarts of **CycleWise™ Outbound™** per 100 Gallons of water every 6-8 weeks or as needed. For smaller, more intensive growing areas, apply at a rate of 4-6 ounces with 5-10 Gallons of water per 5,000 square feet.

**IMPORTANT:** Always add product last to spray tank containing required amount of water and when combining with other products. Apply to foliage early morning or late afternoon.

*Exceeding recommended application rates could waste product without any added benefit.*

### Storage and Disposal

Store in a cool, dry area away from direct sunlight. Keep container closed when not in use. **KEEP OUT OF REACH OF CHILDREN.**
